## **Airgain Inc. Appoints Former Hewlett-Packard Chief Executive to Board**

*Former Hewlett-Packard CFO and interim CEO Robert Wayman joins smart antenna developer*

Carlsbad, Calif.; April 1, 2008 – Airgain, Inc., a smart-antenna innovator improving wireless connectivity in next-generation wireless systems, welcomes Robert Wayman to its board of directors. Mr. Wayman retired from Hewlett-Packard in December 2006 following a 37-year career with the world’s largest PC maker.

"We are pleased to add Robert Wayman to the company's board," said Airgain President and CEO Pertti Visuri, Ph.D. "He is a well-respected corporate leader whose insights and experiences will be key to moving Airgain forward as the leader in providing high-performance, reliable wireless connectivity throughout the home."

Named chief financial officer of Hewlett-Packard in 1984, Wayman started with the company in 1969. He served on HP’s board of directors from 1993 to 2002 and from 2005 to 2007. Mr. Wayman was also interim CEO for Hewlett-Packard in 2005.

Wayman is also a director of Conway Inc., Affymetrix, and Sybase Inc. and graduated with a bachelor's degree in science engineering and a Master of Business Administration degree from Northwestern University.

### **About Airgain**

Airgain is a leading smart antenna and wireless systems developer focused on improving the mass market’s wireless connectivity experience through its embedded antenna technology and modular wireless system products. Our innovative antenna solutions and systems open up exciting new possibilities in residential wireless services requiring design flexibility and reliable, whole-home wireless data and video coverage. Airgain’s expanded portfolio of embedded antenna products includes its flagship, high performance MaxBeam product line for 802.11b/g and 802.11n MIMO systems, and its new Profile family of low-profile PCB antennas for increased design flexibility. Airgain supplies its embedded antennas and systems to original equipment and design manufacturers worldwide from its headquarters in Carlsbad, California,

which is supported by an Asian office in Taipei, Taiwan and research center located in St. Petersburg, Russia. For more information, visit [www.airgain.com](http://www.airgain.com).
