

AirgainConnect® Fleet™

The Next Generation 5G Vehicle Gateway

An all-in-one 5G modem and Wi-Fi router with high powered antenna in a stealth form factor

Vehicle connectivity can often require a complicated configuration, with multiple components including router, antenna, and more. AC-Fleet™, streamlines the configuration with a dynamic, all-in-one device, delivering high-performance, ruggedness, and ease of installation.

AC-Fleet combines a powerful 5G modem and built-in Wi-Fi router with high-performance antennas in a stealth, roof-mounted device. This simplifies installation, configuration, and ongoing management while enhancing performance and freeing up space in the trunk.

FEATURES

- Roof-mounted, all-in-one device
- Completely sealed with IP67 and IP69K rating
- 5G NR modem
- Wi-Fi 6 access point and client with programmable depot mode
- Built in GNSS
- 5G/LTE, Wi-Fi, and GPS antennas
- Pre-loaded bootstrap plus up to four downloadable eSIMs
- Local GUI and remote cloud management

BENEFITS

- Improved Coverage
- Eliminates RF cable loss
- Easier Configuration
- Low Profile for Stealth Applications
- Space Savings Inside the Vehicle
- Value Priced

The AirgainConnect Fleet Ecosystem

AirgainConnect Fleet offers multiple accessories that can greatly enhance the seamless connectivity throughout your fleet vehicle. Accessories include:

- Four-port switch - connects devices mounted in the trunk or under the dashboard
- Wireless GPIO hub - for tracking vehicle activity and events
- Wireless OBD-II interface - for vehicle telematics
- Programmable button with indicator lights - to show your device status and more
